Sample Test Questions for the Entrance Examinations for Entry into the First Year of the Master's Degree Programme

Basket	Sample test question	Answer (A)	Answer (B)	Answer (C)	Answer (D)	Correct answer	
5.	2	Slumpflation is the situation in the economy when:	price level increases and unemployment declines	production stagnates, while the price level declines	production and unemployment grow	price level rises and production stagnates	d
6.	2	In the case of NAIRU applies that:	the price level grows in the economy	the price level declines in the economy	the price level remains unchanged	prices react to the external shocks	c
7.	2	The change of the AD slope cause in the Keynesian model:	investment	government expenditures	export	rate of income tax	d

Sample Test Questions for the Entrance Examinations for Entry into the First Year of the Master's Degree Programme

MATHEMATICS AND STATISTICS

Mathematics and statistics are disciplines which are widely applied in areas such as finance, business, management, economics and other fields in the social sciences. Sample test questions (7) for the online entrance test are divided into two baskets. First basket consists of 4 sample test questions from the bachelor mathematics (quantitative methods) topic. Second basket contains 3 questions from the bachelor statistics area. Correct answer could be verified in the last column of the table.

Basket	Sample test question	Answer (A)	Answer (B)	Answer (C)	Answer (D)	Correct answer		
1.	1	A function is defined by the formula $f: y = x^2 - 6x + 8$. Calculate the first derivative in the point 1; i.e. $y'(1) =$		$y'(1) = 2$	$y'(1) = 0$	$y'(1) = -4$	$y'(1) = 1$	c
2.	1	The extreme value of the quadratic function $y = x^2 + 4x$ is attained at $[x^*; y^*]$:		$[-2; 1]$	$[2; 8]$	$[-2; -4]$	$[1; 9]$	c
3.	1	The value of the definite integral $I = \int_0^2 2dx$ is:		$I = 4$	$I = \frac{7}{3}$	$I = 2$	$I = 1$	a
